KUSUMA REDDY

Hyderabad, India 500090 | 9652282883 | kusumareddy202@gmail.com | LinkedIn | GitHub

Professional Summary

Full Stack Developer with hands-on experience in Java, Spring Boot, React.js, PostgreSQL, and REST API development. Worked on enterprise procurement applications at Effigo Global, contributing to supplier management, workflow automation, and frontend-backend integration. Strong understanding of OOP, DBMS, Data Structures, and Agile development practices. Seeking opportunities to build scalable and impactful software solutions.

Professional Experience

Software Engineering Intern **- Effigo Global** Jan 2026 – May 2026

- Developed and maintained backend services for procurement and sourcing modules using Java, Spring Boot, Spring Data JPA, PostgreSQL, and REST APIs
- Implemented supplier management, RFQ workflows, bid submission tracking, supplier timelines, and clarification processes, improving procurement workflow efficiency
- Designed and developed automated email notification services for supplier invitations, SES/GRN approvals, template submissions, and pending approval reminders using scheduled jobs and dynamic templates
- Contributed to mobile application development by implementing supplier management features, pending approver workflows, and analytics dashboard integrations
- Worked on the Central Procurement Web Application, developing end-to-end features involving frontend-backend integration, workflow automation, and notification management
- Built and consumed RESTful APIs to enable seamless data exchange between frontend and backend systems
- Collaborated with cross-functional teams in an Agile environment, participating in requirement analysis, development, testing, bug fixing, and deployment activities
- Utilized Git, Maven, Postman, and SonarQube for version control, API testing, build management, and code quality assurance

Validation Intern – Elmer Technologies July 2025 – Dec 2025

- Performed validation and verification of business documents to ensure accuracy, completeness, and compliance with client requirements
- Identified, documented, and escalated data discrepancies and quality issues, supporting defect detection and process improvement initiatives
- Maintained detailed validation records and documentation while adhering to confidentiality, security, and quality standards
- Collaborated with internal teams to review records, resolve inconsistencies, and ensure timely completion of validation processes

Salesforce Developer Intern – Tech Mahindra May 2025 – June 2025

- Assisted in testing and debugging Salesforce applications for smooth deployment
- Identified and resolved functional errors in code prior to client delivery
- Created admin and sub-admin profiles, validating system processes to ensure reliability
- Performed sandbox operations to support testing and troubleshooting activities

Java Development Intern – Cognifyz Technologies (Graduation Internship) Nov 2024 – Dec 2024

- Designed and validated a Random Password Generator with customizable complexity
- Developed and tested a multithreaded Java application capable of handling 50 concurrent processes

Skills

- **Programming Languages:** Proficient in Java, JavaScript, and Python with experience in backend development, frontend integration, and test case design
- **Backend Development:** Experienced in developing scalable applications using Spring Boot, Spring MVC, Hibernate, JPA, Microservices architecture, REST APIs, and Swagger for API documentation
- **Frontend Development:** Worked on frontend-backend integration using React, Bootstrap, HTML, CSS, and JavaScript to build responsive web applications
- **GenAI Development (Python):** Built and deployed LLM/ML solutions using Hugging Face Transformers, OpenAI APIs, scikit-learn, TensorFlow, and PyTorch with expertise in Prompt Engineering, RAG pipelines, and LoRA/Fine-tuning; exposed inference services via FastAPI/Flask REST APIs
- **GenAI Integration (Java):** Integrated Python-hosted AI services into Java Spring Boot applications with API consumption, caching, logging/monitoring, Docker, and basic CI/CD pipelines for scalable and testable deployments.
- **Frameworks & Technologies:** Skilled in Spring Boot, Spring MVC, Hibernate, JPA, React, Bootstrap, REST APIs, Microservices, Machine Learning, and Deep Learning technologies
- **Databases:** Hands-on experience with MySQL, PostgreSQL, and MongoDB including query optimization, indexing, schema design, and database management
- **Cloud & DevOps:** Familiar with AWS services, Docker, CI/CD workflows, Git, Maven, and SonarQube for application deployment and code quality management
- **Tools & Platforms:** Experience with Android Studio, VS Code, Postman, Git, Maven, SonarQube, Windows, and Ubuntu environments
- **Relevant Coursework:** RDBMS, Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, SDLC, STLC, Agile, Waterfall, Spiral, and Incremental software development/testing models

Education

GOKARAJU LAILAVATHI ENGINEERING COLLEGE, HYDERABAD Oct 2022 – Jun 2025

- B.E. in Computer Science and Engineering

ANURAG ENGINEERING COLLEGE, KODAD Jun 2019 – Apr 2022

- Diploma in Electronics and Communication Engineering

Certifications

- Solved 1000+ problems on CodeChef , SQL for Data Analytics – Great Learning
- **Responsive Web Development** – FreeCodeCamp AWS S3 Basics – Coursera
- Completed **Java Full Stack Training Certification** (VEDAIT)
- Completed **AI & GenAI** Certification – Coursera
